**DETAILED ACTION**

Receipt of RCE dated 3-18-08 is acknowledged.

Claims 1-10 and 26 are pending. Claims 11-25 are canceled.

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection.

Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114.

Applicant's submission filed on 3-18-08 has been entered.

***Response to Arguments***

Upon consideration of the applicants' arguments filed 3-18-08, the rejection of record has been withdrawn and the following new rejection has been applied:

***Claim Rejections - 35 USC § 102***

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 3-5, 8, 10 and 26 are rejected under 35 U.S.C. 102(b) as being anticipated by US 4085264 to Seib et al (Seib).

Seib teaches copolymers of acrylic acid, methacrylic acid and methacrylic acid esters and their use in hair care composition. The specific acrylate polymers (see examples 1-3 polymers in col.3, L 5-42), meet the monomers described in claims 3-5. With respect to the limitations of

suncare and skin care composition of claims 8 and 10, the compositions of Seib are taught for hair, however, the claims do not recite any other components other than the polymer that is also taught by Seib and therefore the composition of Seib also meets the claimed suncare and skin care limitations, which represent future intended use. Hence the above claims are anticipated by Seib.

***Claim Rejections - 35 USC § 103***

3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

4. Claims 1-10 and 26 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 6221389 to Cannell et al.

Cannell teaches a hair care composition comprising an aqueous carrier and water insoluble materials (abstract, col. 3, L 25+). The composition is useful for hair, skin or eyelashes etc. For the water insoluble polymers, Cannell teaches that the polymers are unneutralized or partially neutralized (col. 7, Lines 33-40) and suggests specific polymers such as Luvimer 36D (col. 8, L 33-35), which reads on the instant claimed polymer, particularly made of the monomers recited in claim 5. Cannell shows good hair curling and fixing properties with unneutralized polymers as well as partially neutralized polymer. Cannell is silent with respect to the claimed pH and the percentages of the individual monomers of the polymer.

However, the specific polymers Luvimer 36 D & AMERHOLD DR25, which

include the claimed monomers and accordingly, it would have been obvious for one of an ordinary skill in the art at the time of the instant invention was made include prepare a hair or a skin or a sunscreen composition containing non-neutralized polymers such as above and still obtain the desired hair styling, fixing or other non-styling effects desired.
